

EUNIS 2008

Summary of presentation – Tina Bach, SAP AG

SAP for Higher Education & Research (SAP for HE&R) is an industry-specific solution portfolio to meet the demands of universities and research institutions. This includes SAP Student Lifecycle Management, which manages the student lifecycle and student services, and integrates SAP support for administrative operations with support for education.

Based on the open architecture of the SAP NetWeaver integration and application platform, SAP's HE&R portfolio provides an integrated solution that is designed to facilitate research, teaching and study and to manage core processes of campus administration, including grants management, student information management, funds management, personnel management and financial and managerial accounting.
