Title: E-Learning in Higher Education, Have We Reached a Plateau?
The Annual Gartner/EUNIS Update

Abstract: Gartner's 2008 e-learning survey for higher education indicates the numbers of fully remote courses and programs of study have grown during the past 10 years, while hybrid or blended courses and programs that combine face-to-face mediated learning with technology support have grown even faster. However, the growth in course offerings seems to have slowed during the past year, while the number of programs offered continues to increase. The question, "Has the luster worn off of e-learning in higher education," will be discussed during this annual Gartner/EUNIS presentation.

Biography: Dr. Zastrocky has more than 30 years of diverse experience in higher education. Before joining Gartner, he was a faculty member at several universities, assistant dean, chief information officer, and served as vice president of CAUSE, the international association for managing and using information resources in higher education from 1989-1995 (now EDUCAUSE). He has served as a consultant for a number of colleges and universities and was a vice president of the Kaludis Consulting Group. He has delivered many keynote addresses around the globe and has served as a faculty member for numerous institutes and seminars. He has been widely published on a variety of technology planning and management topics. He has served as a university trustee and a board member for both non-profit and for-profit higher education organizations. Bachelor's degree from Regis University, master's degree from the University of Denver, and a doctor of education degree from the University of Northern Colorado.
